- ☐ Make sure each column has a wrapper around it in your HTML
- ☐ Give a width to each column (preferably in %)
- ☐ Float each column to left
- ☐ Clear anything underneath your columns i.e. a footer using the CSS clear property (clear: both;)
- ☐ Add clearfix class to the parent of any floated elements.
- ☐ Use padding to add space between columns
- ☐ Add box-sizing: border-box; to everything (use the \* CSS selector)
